odin tiles + coverings

## OVERVIEW

Inspired by exposed concrete in industrial settings, **HYPER** displays the characteristic traces of the natural concrete ageing process. Cutting-edge digital technologies are used in combination with special 3D graphics to reproduce the cracks, holes and stains typical of timeworn concrete. This collection is suitable for commercial and residential applications, with its anti-slip surface finish adding an impressive dimension for high traffic commercial areas. **HYPER** has the ability to be mixed and matched with other **GRANDE** interpretations, giving this series endless project possibilities.
