GRANDE COOKING

INNOVATION OVERVIEW

ODIN TILES + COVERINGS is proud to introduce our exclusive GRANDE COOKING innovation. This industry first (and Patent Pending) cooking system has been developed and tested by our technical department; with the support of our manufacturers and suppliers. Available in various design interpretations and colour tones, these advanced digital print porcelain stoneware panels have the aesthetic qualities and technical characteristics for application directly over our custom-made induction cooktop devices. The superior functionality and benefits of induction cooking, paired with the beauty and practicality of porcelain as a bench surface, combine to create the exciting future of home kitchens. Porcelain stoneware is one of the most sophisticated and advanced architectural surfaces and is a market leader when it comes to care and maintenance. The

GRANDE bench surface is impervious to all liquids, food and cooking products; therefore making it non-porous and importantly stain resistant. Due to the premium surface glazings applied in the manufacturing process, no ongoing product treatments or sealing is required. GRANDE can be maintained with mild detergent-based cleaners and does not attract dust or dirt, making it extremely hygienic and perfect for kitchen use. The possibilities and advantages are endless with this state-of-the-art innovation, with GRANDE COOKING'S unrivalled aesthetic beauty creating a seamless and astonishing outcome for any home kitchen.
